BAU winter workshop

sustainability, urban quality & urban transformation

activity INTERNATIONAL WORKSHOP _ INDUSTRIAL HERITAGE TODAY

This is already the 7th time that ETSAB will join BAU Winter Workshop. This time we will focus on different urban textures that make up the city of Istanbul. Several former industrial sites will be visited to discover their urban layout by walking and observing carefully. Reading urban space and analysing the many present patterns will help the students, local and international alike, to understand specificities and identities. By using Istanbul as case study students will be able to apply the obtained knowledge to other places and circumstances.

dates & venue 31 January to 3 February 2023 in Istanbul, Turkey

programme & outcome Visits and excursions | Fieldwork | Lectures | Workshop
Working in groups students will realize a video representing their town experience, using different graphic technics.
All activities carried out in English. Visa required.

participant universities **BAU** Bahcesehir University, Istanbul
ETSAB Escola Tècnica Superior d'Arquitectura de Barcelona
