## BAU FALL WORKSHOP

This is already the 8th time that ETSAB will join BAU Workshop. This time we will focus on different urban textures that make up the historical city of İstanbul. Several locales will be visited to discover their urban layout by walking and observing carefully. Reading urban space and analysing the many present patterns will help the students, local and international alike, to understand specificity and identities. By using Istanbul as case study students will be able to apply the obtained knowledge to other places and circumstances.
