

## X MBLANDARCH INTERNATIONAL WINTERSCHOOL

### LLOBREGAT (BARCELONA) & HUVEAUNE (MARSEILLE)

redefining  
the green & blue infrastructure  
of two mediterranean cities

**activity** The main objective of the workshop is to study the relationship between Barcelona & Marseille and their closest natural and urban environment, according to the term: CITY- GREEN INFRASTRUCTURE – AGRICULTURE

The workshop will redefine and improve the relationship between both cities and its natural surroundings following the natural riverbeds of Llobregat & Huveaune rivers, with an integrative design approach, by enhancing and improving: biodiversity, physical & ecological connectivity, productivity and urban porosity.

This joint design studio offers a multidisciplinary learning experience in an international workshop between ENSPVM (France) & MBLandArch (ETSAB-UPC) in partnership with the Barcelona Metropolitan Area [AMB]. Students will be exposed to a real project and will benefit of feedback and discussions with AMB professionals currently involved in the project, contributing to the making of actual landscape design strategies.
