### INTERNATIONAL WORKSHOP \_ SOUNDS OF ISTANBUL

This edition of the ISTANBUL Winter Workshop will work on sounds. When reading or designing space, we tend to focus on the visual aspects. But at least three more sense-related qualities define the character of our physical environment. One of them is sound, with all its expressions, ranging from music to noise. The biggest variety of sounds is to be found in town: where else do we have such an amount of different sound producers? The workshop will explore ways of registering and expressing sound by unusual means and how to translate the beat of the city to images. Istanbul, for sure the city with the richest soundtrack in the world, will be the best option to do it.
