

The Paper House

International Workshop
25th March – 12th April 2019

“Would you like to work along with a cohort of First and Second Year students from WSA Cardiff University in the design and construction of a 1:1 space at the ETSAB? Then, do not hesitate and join us straight away!”

activity

The overall object of ‘The Paper House’ is to consider the whole process of design, in terms of geometry, material and manufacturing. By starting with an intuitive experimentation to discover the properties of corrugated cardboard to build up a material system narrative, students will have the chance to translate their design from the drawing to a 1:1 construction, considering that all components have to be conceived from flatpack cuts, looking at the nesting strategies for material optimization, understanding the logic of corrugated cardboard, taking into account the structural behaviour of the system and envisioning the potential of such a construction system to build a human-scale space to inhabit.

A cohort of First and Second Year students from the ETSAB Barcelona and the WSA Cardiff will work along in synergy to design and make ‘The Paper House’, in a significant indoor site within the premises of the ETSAB, in Barcelona.
