

SUMMER SCHOOL
VALLE DI MUGGIO
TICINO, SWITZERLAND
25 JUNE – 3 JULY 2022

REVEALING ENCOUNTERS

actividad REVEALING ENCOUNTERS, Summer School en Valle di Muggio, Ticino, Suiza.

tema The Valle di Muggio will be taken as a case study in order to reflect on the relation between the public space and the social life of the community living in it. We will investigate on the potential of architecture to encourage relations between people, as a reaction to the phenomena of solitude which is more and more taking over the peripheral regions of Ticino, of Switzerland, of Europe.

Groups of three students will engage each with one specific village of the Valle di Muggio. They will consider the realities of elderly people and the community as a whole that live in these peripheral regions. Students will investigate, will observe, will listen and will understand how the community relates to the public space surrounding them. In a first step students will discover the identities of the five villages through drawings. They will observe closely their public spaces, observing moments which reveal the nature of the lived space. Students will then uncover evidences for possible interventions. They will envision fragments of imagination that create moments of subversion, of interaction, of togetherness. In the final days of the summer school they will collaborate with local craftsmen and craftswomen in order to build a fragment of everyday life of a community.

At the end of the summer school, the interventions created by the students as well as the developmental steps leading to the outcome will be collected and merged into a publication.
