INTERDISCIPLINARY APPROACH TO PROMOTE SOCIABILITY IN LIVING ENVIRONMENTS

activity WINTERSCHOOL: INTERDISCIPLINARY APPROACH TO PROMOTE SOCIABILITY IN LIVING ENVIRONMENTS

presentation This winterschool is a two-week programme based in intersectorial studies in different fields: Urban Design, Environmental Sciences, Sociology and Psychology. This intensive workshop is framed in the context of the European Project **STUD.IO: Sociability Through Urban Design Innovation**, funded by the Strategic Partnerships for Higher Education-KA203 program.

topic 70% of the population currently lives in European cities, where are concentrated more than 75% of jobs at EU level. At the same time, it is always in cities that the most serious social problems occur, such as **difficulty in accessing services, housing problems, physical degradation and social and environmental disintegration.**

Recent reports and surveys conducted on **happiness in European city life** (Eurostat 2018 and Eurobarometer 419, 2016) show that in Italy, Romania and Slovakia there is an “unhappy” propensity compared to the European average, with differences at a regional and local level depending on the size of population centres.

Having Enna and the municipalities in the surroundings as a case study, the winterschool will focus on the elements that affect the city life and the individual sociability (that is: the urban organization and the social policies related to it) **to fully understand the social needs, the main conflicts and the strengths of the urban context**, both from a theoretical point of view (in the morning sessions) and from a practical point of view (in the afternoons). The course will provide knowledge and skills in the fields of **urban and territorial planning**, taking into account the **sociological and psychological aspects** to understand **how to plan, design and intervene in living environments.**

participant universities

participant NGOs

professors UPC

Eulàlia Gómez-Escoda + Alvaro Clua Uceda, DUOT-ETSAB

dates

On site module (Enna, Sicily) January 15 - 29, 2023 | Online module: to be completed before April 2023.

schedule

On site module: From Monday to Friday, 9:00-13:15 and 14:15-17:45

costs

The organization is responsible for transportation costs (up to €275 per participant) + accommodation and meals (up to €854 per participant).

places

10 places for students:
GARq - Grau en Estudis d'Arquitectura (third to fifth year) ETSAB and ETSAV
MARq - Màster Universitari en Arquitectura ETSAB and ETSAV
MBArch - Màster Universitari en Estudis Avançats en Arquitectura ETSAB
PhD candidates - ETSAB-UPC

credits

4 ECTS (GARq ETSAB students)
